Angles in Polygons

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided – *there may be more space than you need.*
- You must **show all your working.**
- Diagrams are **NOT** accurately drawn, unless otherwise indicated.
- If your calculator does not have a π button, take the value of π to be 3.142 unless the question instructs otherwise.

Information

- The marks for **each** question are shown in brackets- *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Keep an eye on the time.
- Try to answer every question.
- Check your answers if you have time at the end.

1. Calculate the size of the angle marked x .

○

.....
(Total for Question 1 is 3 marks)

2 Calculate the size of the angle marked x .

○

.....
(Total for Question 2 is 3 marks)

3. Below is a regular hexagon.

(a) Work out the size of the angle marked x°

○

.....

(2)

(b) Work out the size of the angle marked y°

○

.....

(2)

(Total for Question 3 is 4 marks)

4. Below is a regular hexagon and a regular pentagon.

Work out the size of the angle marked x°

○

.....
(Total for Question 4 is 4 marks)

5. A regular polygon has 15 sides.
Work out the size of each interior angle.

○

.....
(Total for Question 5 is 3 marks)

6. Here is a hexagon ABCDEF.
 Angle ABD = 2 x angle DEF
 Find the size of angle DEF

Diagram not drawn accurately

.....
 (Total for Question 6 is 4 marks)

7. Below is a pentagon ABCDE with a line of symmetry through C.

Find the size of angle BCD.

Diagram not drawn accurately

.....
 (Total for Question 7 is 4 marks)

8. Each exterior angle of a regular polygon is 24° .
Work out how many sides the polygon has.

.....
(Total for Question 8 is 2 marks)

9. Each interior angle of a regular polygon is 150° .
Work out how many sides the polygon has.

.....
(Total for Question 9 is 2 marks)

10. A regular polygon has 18 sides.
Work out the size of each exterior angle.

○
.....
(Total for Question 10 is 2 marks)

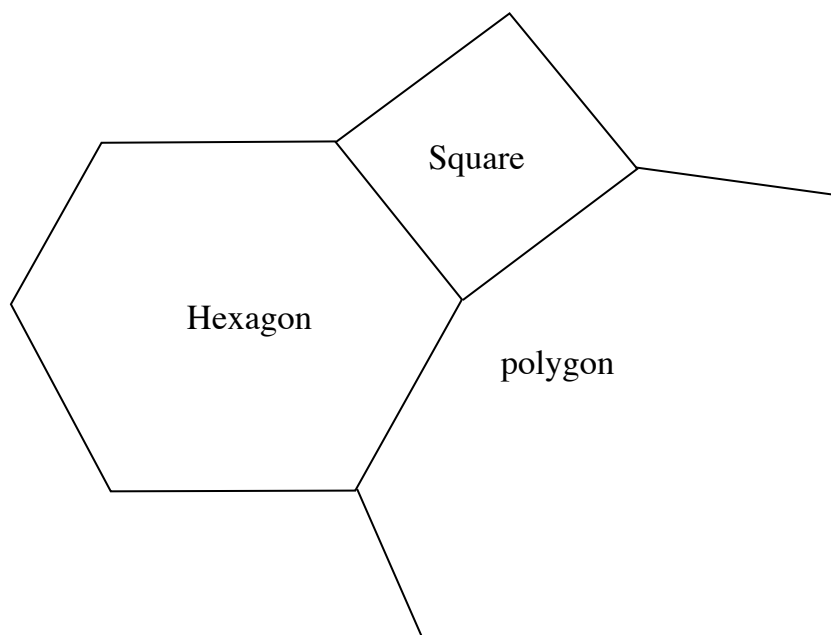

11. Shown is an interior angle from a regular polygon.

Calculate the number of sides the polygon has.

.....
(Total for Question 11 is 2 marks)

12. Shown below is part of a regular polygon, a regular hexagon and a square meeting at a point.

Work out how many sides the regular polygon has.

.....
(Total for Question 12 is 4 marks)

13. The exterior angle of a regular polygon is three times smaller than the exterior angle of a regular hexagon. Work out how many sides the polygon has.

.....
(Total for Question 13 is 4 marks)

14. The interior angle of a regular polygon is 5 times its exterior angle.

Work out how many sides the polygon has.

.....
(Total for Question 14 is 4 marks)
